
EndNote Online for Chromebook

If you are a Chromebook user you will not be able to install the full software (desktop) version of EndNote. However, EndNote Online is a web-based version of the EndNote software, which you can use on Chromebook and will still allow you to do much of your reference management work.

EndNote Online allows you to save references for books, journal articles, webpages and other sources into a personal account as you carry out your research. You can then use this information to help you write your citations, and it will format your reference list for you automatically and correctly.

4. Writing in-text citations	10
4. Exporting a reference list from EndNote	11

1. Registering for EndNote Online

To use EndNote Online you will need to make yourself an account.

- Go to: <http://endnote.com>
- Click the **EndNote online login** link in the top right-hand corner of the screen.
- Click the **Register** button on the right-hand side of the screen.
- Enter your email address, first and last names in the boxes provided.
- Make yourself a password following these guidelines:
 - Passwords should be at least 8 characters.
 - Must contain at least 1 letter.
 - Must contain at least 1 number.
 - Should not have any leading or trailing spaces.
 - Should have at least 1 special character: ! @ # \$ % ^ () ~ * { } [] | \ & _
- When you have completed this, click the **Sign up** button.

A confirmation email will be sent to you. Follow the instructions in this to complete your registration. You can now start saving references into your EndNote Library.

When you first log into EndNote you will see the **Getting Started** guide.

The image shows a screenshot of the EndNote 'Getting Started' guide. At the top right, there is a link labeled 'Hide Getting Started Guide'. A callout box with a black border and white background points to this link, containing the text: 'To see your library click the **Hide Getting Started Guide** link. You can return to the guide at any time by clicking the link again.' Below the link, the 'Getting Started' section is visible, featuring three main categories: 'Find', 'Store & Share', and 'Create'. Each category has a brief description and a list of links. The 'Create' category includes a link for 'Cite While You Write™ Plug-In'. A second callout box with a black border and white background points to this link, containing the text: 'Please note: The *Cite While You Write Plug-In* will not work on Chromebook, so ignore this link.'

To see your library click the **Hide Getting Started Guide** link.
You can return to the guide at any time by clicking the link again.

- [Create a formatted bibliography](#)
- [Format a paper](#)

Please note: The *Cite While You Write Plug-In* will not work on Chromebook, so ignore this link.

2. Adding references to EndNote

When you search databases to find journal articles, books and other information it is usually possible to import the records you find into your EndNote Library. This has the advantage of allowing you to import references accurately without having to re-type all the information yourself.

Saving references from Library Search

As you use Library Search to find books, journal articles and other information you can save the records you find directly into EndNote Online.

- Go to the Library homepage at <https://www.salford.ac.uk/library>
- Click the red **Library Search** link (near the top of the page).
- Type in your keywords and click the search button.

Click the quotation marks " next to the item you want to save, then click **ENDNOTE WEB**.

Click the **My References** tab to see the reference you have just imported.

All Page Add to group... Copy To Quick List Delete Sort by: Last Updated -- newest to oldest

Author	Year	Title
Austin, John	2010	So now you're a zombie : a handbook for the newly undead Added to Library: 16 Jun 2017 Last Updated: 16 Jun 2017

Records, especially for books, that you import from Library Search may need some editing.
Click on the title link to open the record.

Bibliographic Fields: **Save**

Reference Type: Book

Author: Austin, John 

Title: So now you're a zombie : a handbook for the newly undead

Year: 2010

Series Editor:

Series Title:

Place Published: Chicago

Publisher:   **B I U** | **A, A'**
Chicago : Chicago Review Press

The author's name may have the word 'author' after it. If this is the case, delete it, so only the name remains.

Sometimes punctuation is incorrectly imported. Click in the field to edit it.

The place of publication (e.g. Chicago) has been entered twice, so you will need to delete it and the colon from the **Publisher** field.

Bibliographic Fields: **Save**

Reference Type: Book

Author: Austin, John 

Title: So now you're a zombie : a handbook for the newly undead

Year: 2010

Series:

Series Title:

Place Published: Chicago

Publisher: Chicago Review Press

When you have finished editing the record click the **Save** button.

Edition:   **B I U**
Seventh edition

Also check the **Edition** field for any book references you get from Library Search. Delete the word 'edition' or 'ed.'. If the number is spelled out in letters change it to a number – for example, this should read **7th**.

Austin, J. (2010). *So now you're a zombie : a handbook for the newly undead (7th ed.)*. Chicago: Chicago Review Press.

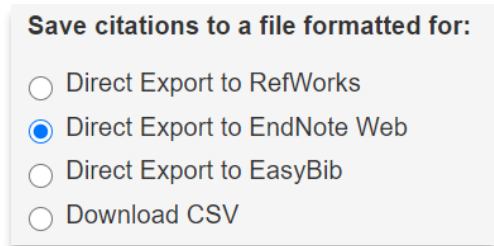

This will ensure a correctly formatted reference.

Collecting references from other databases

Web of Science and EBSCO

A few databases, such as Web of Science and the EBSCO databases, allow you to save records directly into EndNote Online.

Once you have selected the references you want look for a link called Export, Download or Citation, then look for an export option called EndNote Online or Endnote Web.

Using filters - Science Direct

For most databases, saving records into EndNote Online is a two-step process: you save a temporary file from the database, then import that file into your EndNote Online library. The instructions below for Science Direct outline the steps needed for this type of database. Note: these instructions are for Google Chrome.

Once you have your search results:

Click the checkboxes next to the articles you want, then go to the **Export** menu.

Click **Export citation to RIS**.
Note: when using other databases, always look for an export option that is called **EndNote** or **RIS**.

Return to EndNote Online:

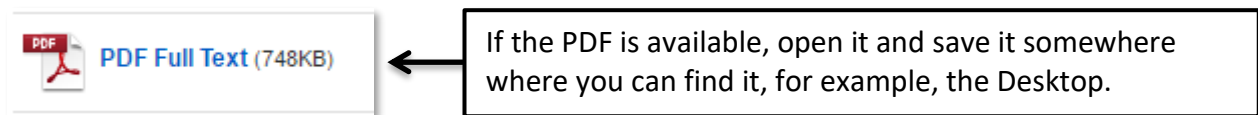

Attaching PDFs

Once you have saved a reference into EndNote Online you might find it useful to attach the full-text PDF. This is good information management, as it means that you will have the article and the details you need to reference it all in the same place.

Aizenberg, Edna 1999 I walked with a zombie: The pleasures and perils of postcolonial hybridity World Literature Today
Added to Library: 17 Nov 2015 Last Updated: 22 Jun 2017
Online Link → Go to URL
 

Click Go to URL or Find it @ Salford to see if the PDF is available.

 PDF Full Text (748KB)

If the PDF is available, open it and save it somewhere where you can find it, for example, the Desktop.

I walked with a zombie: The pleasures and perils of postcolonial hybridity World Literature Today
Added to Library: 17 Nov 2015 Last Updated: 22 Jun 2017
Online Link → Go to URL
 

File Attachments 

No Files Attached

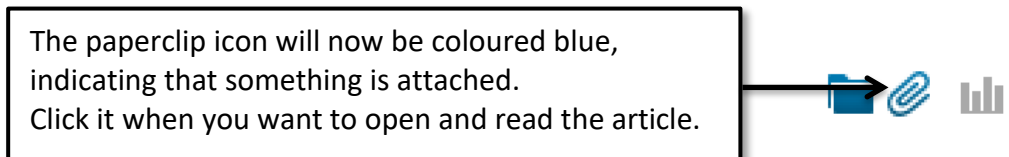

When this box opens click the Attach files link.

File: out.pdf

Click the **Choose File** button and find the PDF you have just saved. Open it.

Click the **Upload** button when it appears.

The paperclip icon will now be coloured blue, indicating that something is attached. Click it when you want to open and read the article.

Creating references manually

You will probably use information sources where electronic records are not available for saving into EndNote, for example, webpages, blog entries, online newspaper articles and reports you have found online. In these cases you will need to create manual references.

The screenshot shows the 'New Reference' dialog box in EndNote. The 'Collect' tab is selected in the top menu. Below the menu, the 'New Reference' button is highlighted. In the 'Bibliographic Fields' section, the 'Reference Type' dropdown is set to 'Web Page'. The 'Author' field contains 'National Health Service,'. The 'Title' field contains 'Who's at higher risk from coronavirus'. The 'Year' field contains '2020'. The 'Save' button is highlighted in blue. Several callout boxes provide instructions: 'Click the Collect tab, then click New Reference.' points to the 'Collect' and 'New Reference' buttons; 'Select the type of information source you have from the Reference Type menu.' points to the 'Web Page' dropdown; 'Type the information into the fields – you need to click into the field before you can type into it. Follow the advice about typing authors' names. If the work is written by an organisation rather than a person you need to type a comma at the end of it, e.g. National Health Service,' points to the author field; and 'Click Save when you have finished.' points to the 'Save' button.

Important!

Remember that every reference must have all of the following elements, otherwise it will be incorrect.

Element	Field in EndNote
Who - wrote or created it.	<i>Author</i>
When - it was published or produced.	<i>Year</i>
What - is the title of the work.	<i>Title</i>
Where - you found it (or how to find it): use one of these combinations:	<i>Place of Publication and Publisher</i> <i>Volume, Issue and Page Numbers</i> <i>DOI</i> <i>URL</i>

When making manual references in EndNote you may need to experiment with the different Reference Types and with the information you enter, to make sure they are correct. To see how your completed references should look see the examples on the **Skills for Learning** site at:

<https://www.salford.ac.uk/library/skills-for-learning/referencing>

3. Organising your references

You should make a Group for each assignment you are working on. This will make it much easier for you when you start writing your citations and to create your reference list.

My References Collect **Organize** Format Match Options Downloads

Your Groups are listed here. Click on the title link to see which references are listed within it.

Note: you can add the same reference to more than one Group.

4. Writing in-text citations

When using EndNote Online and EndNote Desktop you would normally install a toolbar into Word (called Cite While You Write – CWYW) to insert in-text citations into your documents. However, you won't be able to install this on a Chromebook so you will need to type your citations manually.

When you start writing your assignment, click the link to open the Group you made for it. Then click the title link for the work you wish to cite. This is so you can check how many authors each reference has, so you can create your citations correctly following the guidelines below.

1. When your citation is at the end of a section, follow this format:

One author:	(Parviz, 2020)
Two authors:	(Comentale & Jaffe, 2014)
Three, four or five authors:	(Mecham, Thomas, Pirgousis, & Janus, 2020) For subsequent citations for works of three or more authors you should abbreviate the citation to (Mecham et al., 2020)
Six or more authors:	(Houghton et al., 2016)

2. When the citation is incorporated into your own writing:

- follow the above guidelines for the number of authors to list,
- only the year should be in brackets,
- if you have more than one author replace the ampersand (&) with the word and, for example: Comentale and Jaffe (2014).

3. If you have used a direct quotation (copied word for word from the original), you should include the page number you copied those words from in your citation, e.g.

(Parviz, 2020, p. 43) or Parviz (2020, p. 43)

For more advice about writing in-text citations, please see the **APA 6th Style Guides** available on the **Skills for Learning** site at:

<https://www.salford.ac.uk/library/skills-for-learning/referencing>

4. Exporting a reference list from EndNote

Once you have finished writing your assignment you can use EndNote Online to create a reference list for you automatically, which you can then copy and paste into the end of your work.

Click the **Format** tab.

Select the Group you made for your assignment from the **References** menu.

Select **APA 6th** from the **Bibliographic style** menu. This is the style you must use at Salford.

Select **RTF (rich text file)** from the **File format** menu, then click **Save**.

Your reference list will be saved to your Documents folder. You can open it by clicking on the downloaded file in the bottom left-hand corner of Google Chrome.

Do not forget to proof-read your reference list before copy and pasting it into your assignment. There may be errors that need correcting, especially in any references you have made manually (see p. 8) or references for books that you have saved from Library Search (see pp. 3-4).

You can check the format for different types of references by going to the **Reference Examples** on the **Skills for Learning** site at:

<https://www.salford.ac.uk/library/skills-for-learning/referencing>
